

### **Services offered by AICRP on BCCP, College of Horticulture, Vellanikkara**

The centre is providing mother cultures of three entomopathogenic organisms such as *Metarhizium anisopliae* var. *anisopliae*, *Lecanicillium lecanii* and *Beauveria bassiana*. The centre is also mass producing and distributing five microbial agents such as *Pseudomonas fluorescens*, *Trichoderma viride*, *Metarhizium anisopliae* var. *anisopliae*, *Lecanicillium lecani* and *Beauveria bassiana* as well as two parasitoids, namely, *Trichogramma chilonis* and *T. japonicum*. Training on mass production of bioagents as well as consultation services for establishment of bioagent production units are also offered by the programme.
