

The need for a Students' Counseling Centre at the College was widely felt need to help out students with their emotional problems and personality development issues. Accordingly the centre was established. It has been organizing guest lectures by eminent speakers on various topics related to personality development besides providing counseling on one-to-one basis for needy students on a regular basis. A one-day trip for soul sharing and emotional camaraderie between staff advisers and students under their ward-ship arranged to preferred destination was well received by staff and students alike. A database of students with relevant details on family ties and emotional bonds is also being prepared under the aegis of the Centre to analyze and identify deficient areas and work out support strategies for individual students.
